TECHNICAL SKILLS

Languages: HTML | CSS | JavaScript | Java | JQuery | Node

Applications: AJAX | Express | MySQL | MongoDB |

PROJECTS

JobJump | github.com/mschall217/job-jump |

- This was a group project designed to help a user search for a new job in our new reality with navigating a pandemic. A user can search for a job while the real time covid data about where the job is loads at the top.
- Lead a group of 3 peer programmers. Managed splitting up task work as well as troubleshooting all areas.
- HTML | CSS | JavaScript | AJAX | Third-Party APIs |

Team Profile Generator | github.com/mschall217/team-profile-generator

- A command line application that simply generates a webpage for a team. This project is easily modified for any business or company to quickly allow managers to highlight their teams and provide easy contact information.
- Designed and developed this application
- Node | JavaScript | HTML | CSS | JavaScript |

Employee Tracker | github.com/mschall217/employee-tracker |

- A command line based application that can help a user easily navigate an employee database. This code can be easily modified for any business.
- Designed completely on my own developed from a user story
- Node | JavaScript | MySQL | Inquirer | Sequelize

E-Commerce Backend | github.com/mschall217/object-relational-mapping |

- This code was designed specifically for the data presented but can easily be manipulated as the basic backend for any small business.
- Designed completely on my own developed from a user story
- Node | JavaScript | Express | MySQL | Sequelize | dotENV |
